### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Collins shows a merged dual flipped White Cell including a dual white cell having a first and second cell regions (figure 3), an optical deflector array (figure 1 Ref 28), a plurality of guided-wave optical delay lines (column 2 lines 11-30), and a plurality of reference mirrors (figure 3). However Collins does not show an input portion and a separate output portion of the merged dual flipped white cell. Collins shows a single input output portion that light is reflected into and using a mirror is then reflected out with the proper delay. Collins does teach using fibers to create the delay instead of a block, fibers inherently have an input and output portion but the same method of using the mirror at the output of the fiber and then the useable output would be the same as the input.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luke D. Ratcliffe whose telephone number is 571-272-3110. The examiner can normally be reached on 8:00-4:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza can be reached on 571-272-6979. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
